ABOUT THIS TRAINING:

Join a cohort of clinicians, pediatricians,
early interventionists, nurse practitioners
and other professionals to:

- Analyze the importance of using a developmentally sensitive, relationship-based and contextually grounded and empirically supported system of diagnostic classification with children from birth through 5 years old through real-world scenarios and case examples
- Uplevel your ability to approach diagnosis from an Infant and Early Childhood Mental Health perspective
- Closely examine the significance of a multiaxial approach for children with mental health and developmental disorders in infancy and early childhood
